

API Limitation:

The API provides information via RapidAPI. The usage limit is set to 500 requests per month.

MyStock Screen:

The home screen displays various stocks, showing their names, current prices, and user-defined stock ranks (such as Hot, Very Hot, Cold, or Normal).

Pull Down to Refresh:

Users can pull down on the screen to refresh and get the updated stock prices on the MyStock screen.

Edit button(move or delete) on MyStock Screen:

It includes an "Edit" button, which allows users to move the stock to different sections (Active or

Watching)by dragging the “☰” icon or dragging the “🔴” icon to delete. Additionally, users can right-swipe a stock to delete it from their collection.

Add-on functionality: Double-click on any cell to display its stock ratio:

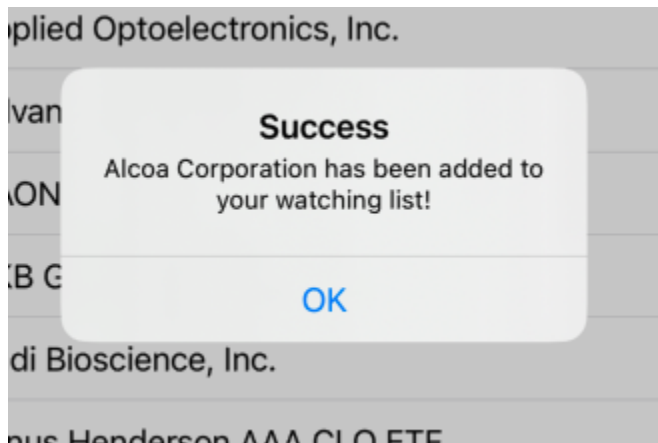

Add button on Home Screen:

Once the user clicks the "+" button on the screen, they will be redirected to another screen where they can search for the stock they want. For example, when the user types "AA," the screen will display all stocks containing "AA" in their name.

After the user adds a stock, a success message will pop up, indicating that the stock has been successfully added.

Stock Portfolio Ranking Page:

Allow users to change the rank of active stocks by clicking the button on the right side of each cell. The rank will be displayed beside the stock name on the main screen:

Hot: " 🔥 "

Very Hot: " 🔥 🔥 🔥 "

Cold: " ❄️ "
